SUMMARY

Full Stack Developer with 5+ years of commercial experience delivering web products end to end: database and API design in Laravel, Vue/Nuxt interfaces, Stripe payments, background processing and performance tuning. Cut API response times by 35-40% and Largest Contentful Paint by 30% on production products. Acted as team lead for a team of four and mentored junior developers. Use Claude Code and Codex in daily development.

SKILLS

Core stack: PHP, Laravel, Vue.js, Nuxt 3, TypeScript, MySQL, Redis
Backend: REST API design, Laravel Horizon, queues (RabbitMQ), Elasticsearch, PHPUnit, Composer, Zend (legacy)
Frontend: JavaScript, Pinia / Vuex, Tailwind CSS, HTML, SCSS, responsive design, Vitest
API & integrations: Stripe / Laravel Cashier, webhooks, Google Maps API, AWS S3
DevOps & tools: Docker, Git, GitLab CI/CD, Linux (Ubuntu), Postman, Laravel Telescope, Lighthouse, Chrome DevTools
AI tools: Claude Code, Codex
Languages: English - B2; Russian - Native

WORK EXPERIENCE

Full Stack Developer | Freelance **Nov 2025 - Apr 2026**
EdTech: Education Management Platform for academic tracking, scheduling, reporting and administration

- Built backend APIs (Laravel) and frontend features (Nuxt, TypeScript) for academic tracking, scheduling and reporting.
- Reduced average response time of key API endpoints by ~40% through query optimization, eager loading and database indexing (measured before and after with Laravel Telescope and Postman).
- Improved Largest Contentful Paint by ~30% through rendering and bundle-loading optimizations (measured with Lighthouse).
- Added Redis caching for frequently accessed data to speed up repeated requests.
- Moved long-running tasks to RabbitMQ queues so they run in the background instead of blocking user requests.

Tech: PHP, Laravel, MySQL, Redis, RabbitMQ, Vue.js, Nuxt, TypeScript, Pinia, Tailwind CSS, Docker

Full Stack Developer | Right&Above **Sep 2023 - Aug 2025**
PropTech: Connected Investors, property investment platform (legacy Zend to Laravel + Nuxt migration)

- Maintained the legacy property platform and contributed to its migration to Laravel and Nuxt 3 / TypeScript.
- Built property listings, dashboards and management workflows across the Laravel backend and Nuxt frontend.
- Integrated Stripe payments and subscriptions, including webhook processing.
- Made Google Maps initialization ~5x faster by reducing API requests and optimizing marker rendering.
- Reduced average response time of key API endpoints by ~35% through MySQL query optimization and Redis caching (measured with Laravel Telescope and Postman).
- Mentored junior developers and standardized Docker development environments to simplify onboarding.

Tech: PHP, Laravel, Zend, MySQL, Redis, RabbitMQ, Vue.js, Nuxt, TypeScript, Pinia, Stripe, AWS S3, Docker

Full Stack Developer | Innowise Group **Dec 2021 - Aug 2023**
Internal HR tools: CV creation and employee management applications

- Built CV builder interfaces, form validation and REST API endpoints with Vue.js and Laravel.
- Implemented Elasticsearch search and filtering for CV records and asynchronous export generation.
- Developed employee management screens and backend workflows in collaboration with the UI/UX team.
- Led a team of four as acting team lead: coordinated tasks, reviewed code and supported implementation decisions.
- Introduced GitLab CI/CD pipelines to automate testing and support releases.

Tech: PHP, Laravel, MySQL, Vue.js, JavaScript, Elasticsearch, Redis, PHPUnit, GitLab CI/CD, Docker

Full Stack Developer | Freelance **Jul 2020 - Nov 2021**
Restaurant / Food ordering and residential management (client projects)

- Developed restaurant ordering interfaces and backend order processing with Laravel, Vue.js and REST APIs.
- Implemented administrative workflows for residence records, status changes and business rules.
- Added Redis caching and RabbitMQ background processing for routine tasks and notifications.

EDUCATION

Software for Information Technologies (ПОиТ) | KBiP, Minsk **Sep 2016 - Jun 2020**
